provident White of the Merchants', ociation expressed himself in favor having the association give its sty support to the project. It will educate and entertoin, giving oblides who have not recently been the mainland their first chance to the heat work in the wonderful scient aviation. It will also be a good notion affair, for some of the tests.

Professor Jaggar Will Be Here Next Month, When Details Will Be Decided Upon.

The movement which was started a thatt time ugo for the purpose of affeeting a permanent local organization to maintain a Volenno abservatory, is going forward in excellent shape and those behind feel a very strong hope of success. The committee which was appointed some six weeks ago to take up the matter of permanent organization, consisting of Lorrin A. Thurston, chairman; Clarence Cooke, J. A. Ken nedy, A. F. Judd, who is at the head of the Hishop Museum; and Professor Gilmore, of the Colelge of Hawaii, has A Honolulu-made airship will be used been proceeding and has already so-A Honolulu-made airship will be used been proceeding and has been proceeding a subscribe a certain amount each year teen years. for five years. Out of these funds a part of the expense of the Doctor Perrel expedition has been borne.

Jaggar Next Month,

Jaggar Next Month,

amining it, Gordon, who is here as the representative of the Curtiss biplane, expressed great surprise at the work done by Schaefer.

"I was simply astounded at the perfection of the machine," said Mr. Gordon, "considering that it had been suilt by a young man wholly without experience. It is constructed on the fartise model, and more perfect than I hould have thought it possible for an mateur to make. Lines, measurements.

Jaggar Next Month,

The committee has also been in correspondence with Professor Jaggar of the Gordon, who is here as the contest. They left the field in silence.

Throughout, the game was a kicking contest. It was fought out on a soggy gridiron, neither team being able to gain consistently by line-bucking or open play. They were practically evenly matched.

The longest run of the day was made by Philbin, Yale's speedy half-back, in the second half, when he broke through for thirty-five yards. Yale's offense showed up better, although toward the last Harvard rushed the ball twentyrection of the machine," said Mr. Gorlon, "considering that it had been suilt by a young man wholly without experience. It is constructed on the Turtins model, and more perfect than I hould have thought it possible for an mateur to make. Lines, measurements, itc., are true to the smallest fraction, and I consider the machine a perfectly afe one to use."

Schnefer's only guide in the work as the study of hiplanes as described a various scientific journals. He was such interested in the subject from the tart, and after a good deal of study et to work to build a machine, with the nnexpected result that his contriance will be used in Hawaii's first higher the consideration of the method of procedure for the forming of the permanent organization is being held in abevance awaiting the arrival of Professor Jaggar in order that the counties are the study of hiplanes as described a various scientific journals. He was juch interested in the subject from the tart, and after a good deal of study et to work to build a machine, with the nuexpected result that his contriance will be used in Hawaii's first high

Observatories and Trial.

In the meantime the committee is going ahead and is doing all that it is possible for it to do at pre-cut. It has in view a number of recommendations which it will make to the per-

ordon will probably fly over Pearl arbor, and excursion steamers will be not from Honolulu for people who want see the flying from the ocean. Goron will give the steamers a "call" as passes them in the harbor, if this an is adopted.

The largest of the inter-island steamers and those in charge of the endage of the ending to the staking of trying to get the new camer Kilanea as an excursion boat. The location, however, has not yet endetermined upon, the matter being if in the hands of the committee of rangements, for consultation with my and navy people who are interest.

Kapiolani Park and Moanains both being discussed.

Some Military Tests.

Thurston's Crater Report.

Mr. Thurston states in his report that he visited the Volcano on November 18 and 19. Professor Perret had pany is now completing, to be turned previously reported that on October 18 over entire to the navy department on the level of the lava lake in the pit December 23, 1911, will cost \$3,296,000.

Marine Barracks.

It is expected however, that the govto any officers taking part, and init began to rise and continued to do
particles the might want so steadily until October 26, at which
learn, and take trial flights. Aviation
learn, and take trial flight learn, and take trial flights. Aviation voluntary service, and hence no orswill be directly issued for any offers to take part, but officers both in Army and Navy are anxious to in all they can of aviation, which pmises to be of such great importance future wars. Admiral Cowles also owed his interest, and said that navy in in his command will want to learn they can.

It ims he left the Volcano. Demosthenes tain vessels of the navy, so instead of the east loch also being cut off from general navigation, a portion of the west loch may yot be taken and developed, in which case additional dredging will have to be done.
